Introduction

Welcome to the Enhanced Mariner Information Notice for the "Revolution Wind_26-01-19".

This plotter file contains the as-built locations of Revolution Wind's export cables and wind turbines, as well as the preliminary locations for the project's inter-array cables and offshore substations. As-built locations will be provided after completion of construction and post-construction surveys have occurred and will be available on National Oceanic and Atmospheric Administration (NOAA) charts.

Wind turbine blade clearance, or air draft, is measured to the Highest Astronomical Tide, or HAT, to ensure the distance between the water's surface and the blade is never less than indicated. The Siemens Gamesa 11-megawatt turbine is approximately 788ft tall and has an estimated air draft of 126 feet.
